Open Analytics

Job Opening Statistician

Profile

Open Analytics is an international company based in Antwerp (Belgium) providing data analysis services and products across geographies and industrial sectors. We are looking to expand our team of statisticians with a candidate who fits the following profile:

- MSc / PhD in Statistics, Applied Mathematics or Computer Science interested to work on applied statistics problems

- team player and good communicator with fluency in English, verbal and written

- strong experience in statistics, data mining or machine learning

- sound knowledge of a language for statistical computing (R, Python, Julia, …)

Description

The successful candidate will

- interact with scientists from Open Analytics customers in order to devise and implement analysis methods tailored to novel experiments

- perform data analyses on challenging datasets to assess the relevance of and fine-tune analysis methods

- provide input to Open Analytics colleagues that develop the broader hardware and software infrastructure for data analysis purposes

Offer

We offer

- a pleasant and challenging environment in which each person can develop their talents

- opportunities to work on exciting problems at the edge of current knowledge and at the forefront of data analysis technologies

- competitive remuneration package and benefits in line with skills and experience

Applications and inquiries regarding the position can be sent to careers@openanalytics.eu until **March 31, 2023**.
